

Biobrain® Supervise

Software Features

Benefits

- Scalable software for almost all bioprocess applications
- Central platform for real-time data and historians of process, analytical and sampling data
- Automated batch execution with the ANSI/ISA-88 compliant recipe control module
- Supports all requirements to archive GMP and FDA 21 CFR Part 11/EU Annex 11 compliance
- Fully user configurable and upgradeable with specific modules
- Installation, configuration, validation and engineering services

Product Information

Biobrain® Supervise software enables you to incorporate a new standard in bioprocess data management and automation.

Its reliable data acquisition, efficient trend monitoring, and advanced recipe control make it an ideal tool for all upstream and downstream processes, no matter if you prefer single-use or reusable systems. The Biobrain® Supervise is your solution for robust and reproducible processes in R&D and GMP environments – all backed by our expertise since 1986.

End of BioPAT® MFCS/win Support and Lifecycle

Main Support End: 13th October 2024

After this date, the delivery of patches for technical or security issues will no longer be provided.

Extended Support End: 14th October 2026

End of Hotline Support.

Migrate now to the MFCS/win successor, Biobrain® Supervise, to ensure compliance and IT security, and benefit from new features and an innovative user interface.
